4.0 release

Update on Moodle 4.0 release timeline

Sander Bangma

Thursday, 5 August 2021, 3:30 PM

Hi all,

I want to give an update on the schedule for the Moodle 4.0 release. As per usual we will enter code freeze in early October, after which no new code will be accepted for the 4.0 release.

However, given the magnitude of the changes we will allow for a longer code freeze and QA cycle prior to release.

Please take note of the following planned schedule:

- **Code freeze:** 4 October 2021
- **QA cycle start:** 1 November 2021
- **Release:** 13 December 2021

With development currently underway this schedule is still subject to change. We aim to present a comprehensive overview of all the 4.0 changes in late September.

4.0 key projects

In progress

- Navigation - [MDL-69588](#)
- Course creation - [MDL-70907](#)
- LTI 1.3 provider - [MDL-69542](#)
- BBB integration - [MDL-70658](#)
- Report builder - [MDL-70343](#)
