

Translate in-Place (MOODLE 3.9)

Translate in Place on theme boost

The screenshot displays the Moodle 3.9 user interface. At the top, the site name 'Moodle39' and the language 'English (en)' are visible. The user is identified as 'Admin User (fullnamedisplay)'. The main content area shows a 'Learning Plan Menu' block with a 'Test' string highlighted. A 'Translate string' dialog box is open, showing the string 'Test' and buttons for 'Cancel' and 'Update'. The background shows a dashboard with various blocks like 'Calendar', 'Private files', 'Content bank', and 'My courses'. The 'Timeline' block shows 'No upcoming activities due'. The 'Private files' block is also visible at the bottom right.

Translate in-Place (MOODLE 3.9)

Translate in Place on theme fordson

The screenshot displays the Moodle 3.9 user interface with the 'fordson' theme. A 'Translate string' dialog box is open, showing the text 'Private files' in a text input field. The dialog has 'Cancel' and 'Update' buttons. An orange arrow points from the 'Private files' text in the dialog to the 'Private files {privatefiles/}' block in the left sidebar. The main content area shows a header with 'Admin User {fullnamedisplay/}' and a navigation bar with buttons for 'Dashboard', 'Calendar', 'Badges', 'All Courses', and 'Create a Course'. Below this is a 'Learning Plan Menu {pluginname/block_lp}' and a 'Test {pluginname/block_recentlyaccessedcourses}' block. On the right, there is a 'Timeline' block with a 'No upcoming activities due' message. The interface includes various 'Edit' buttons and a language dropdown set to 'English (en)'.

Translate in-Place (MOODLE 3.9)

How to enable it

Enable strings parameter:

Debugging

Administration / Development / Debugging

Show origin of languages Default: No

strings

debugstringids

If enabled, language string components and identifiers are displayed when `?strings=1` or `&strings=1` is appended to the page URL.

Make Language Customisation for all existing languages

Dashboard / Site administration / Language / Language customisation

Language customisation

Choose... ▾
